

We're here for your automotive memory needs.

Year after year.

You can count on ISSI when it comes to automotive memories.

At ISSI, we've been supporting the automotive market with high performance SRAMs, DRAMs and EEPROMs for 10 years with extended temperature ranges like -40°C to +125°C. For information about our leading-edge memory solutions, call our local sales offices or visit www.issi.com today.

- SRAM, DRAM and EEPROM product families
- Three automotive temp ranges: -40°C to +125°C; -40°C to +85°C; -40°C to +105°C
- ISO 9001:2000 and ISO 14001 certification
- Long-term support of Automotive Grade parts means less money spent qualifying new parts and servicing end of life requirements
- Leading memory supplier for 20 years

Automotive Memories	Densities
Asynch SRAM	256K to 16Mb
Synch SRAM	2Mb to 72Mb
Synch DRAM	16Mb to 512Mb
Serial EEPROM	1K to 256K
